

# Corrigendum for: Report for 2019 by the AEA Data Editor

*By* LARS VILHUBER\*, JAMES TURITTO†, KEESLER WELCH‡

## Corrigendum 2020-08-04

After publication, Alan Riley (Stata) pointed out a discrepancy between Table 1 and Figure 5, which should be depicting (on average) the same data. This was corrected in the code associated with the AEA Repository migration, and carried through to this document. See the commit implementing the code change.

Original text (pg. 767, 2nd column):

Most supplements (48.37 percent) use Stata at least partially, followed by Matlab (37.47 percent) (Table 1 and Figure 4).

Corrected text:

Most supplements (72.96 percent) use Stata at least partially, followed by Matlab (22.45 percent) (Table 1 and Figure 4).
